

testing::Test

```
classDiagram
    class testingTest["testing::Test"]
    class GpgCoreTest["GpgFrontend::Test::GpgCoreTest"]
    GpgCoreTest --|> testingTest
```

The diagram shows a class hierarchy. At the top is a class box for 'testing::Test' with two empty compartments. Below it is a class box for 'GpgFrontend::Test::GpgCoreTest' with three compartments: the top one contains the class name, the middle one is empty, and the bottom one contains the methods '+ SetUp()' and '+ TearDown()'. A blue arrow with an open triangle head points from the 'GpgCoreTest' box up to the 'testing::Test' box, indicating inheritance.

GpgFrontend::Test::
GpgCoreTest

+ SetUp()
+ TearDown()
