

QWizardPage

```
classDiagram
    class QWizardPage
    class GpgFrontend_UI_ConclusionPage["GpgFrontend::UI::ConclusionPage"]
    GpgFrontend_UI_ConclusionPage --|> QWizardPage
```

The diagram illustrates a class hierarchy. At the top is the 'QWizardPage' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name. Below it is a class 'GpgFrontend::UI::ConclusionPage', represented by a rectangle divided into three horizontal sections. The top section contains the class name. The middle section contains two attributes: '- dont\_show\_wizard\_checkbox\_' and '- open\_help\_check\_box\_'. The bottom section contains two public methods: '+ ConclusionPage()' and '+ nextId()'. A blue arrow with an open triangle head points from the bottom of the 'GpgFrontend::UI::ConclusionPage' class to the bottom of the 'QWizardPage' class, indicating inheritance.

GpgFrontend::UI::ConclusionPage

- dont\_show\_wizard\_checkbox\_  
- open\_help\_check\_box\_

+ ConclusionPage()  
+ nextId()
