

QWizardPage

```
classDiagram
    class QWizardPage
    class GpgFrontend_UI_ChoosePage["GpgFrontend::UI::ChoosePage"]
    GpgFrontend_UI_ChoosePage --|> QWizardPage
```

The diagram shows a class hierarchy. At the top is a box for 'QWizardPage' with two empty slots below the name. Below it is a box for 'GpgFrontend::UI::ChoosePage' which is divided into three sections: a header section, a section for protected attributes, and a section for methods. A blue arrow with an open triangle head points from the 'GpgFrontend::UI::ChoosePage' box up to the 'QWizardPage' box, indicating inheritance.

GpgFrontend::UI::ChoosePage
