

QWizardPage

```
classDiagram
    class QWizardPage
    class GpgFrontend_UI_ChoosePage["GpgFrontend::UI::ChoosePage"]
    GpgFrontend_UI_ChoosePage --|> QWizardPage
```

The diagram shows a class hierarchy. At the top is a box for 'QWizardPage' with two empty slots below the name. Below it is a box for 'GpgFrontend::UI::ChoosePage' which is divided into three sections: the top section contains the class name, the middle section contains a protected attribute '# next_page_', and the bottom section contains public methods '+ ChoosePage()', '# nextId()', and '- slot_jump_page()'. A blue arrow with an open triangle head points from the 'GpgFrontend::UI::ChoosePage' box up to the 'QWizardPage' box, indicating inheritance.

GpgFrontend::UI::ChoosePage

next_page_

+ ChoosePage()

nextId()

- slot_jump_page()
